Resilience Strategies for Dynamic Times

for Managers & Business Owners

A one-day workshop to help you to help others navigate & manage change & challenge

Given the dynamic and constant changes in today's world our most important skill is our ability to adapt quickly and be resilient to change. When we can pivot in the face of adversity and develop productive, supportive, and encouraging responses to unexpected situations, we build our confidence, improve our relationships, and gain the respect of those around us. If you're scratching your head trying to find tools and strategies to share with your team, this workshop is just for you!!

Who should attend?

Managers & Business Owners who want to grow & develop their skills toolbox to support & empower their team members. When teams are skilled to respond constructively to unexpected situations & develop productive and positive responses, it saves everyone time & energy.

“Between stimulus and response there is a space. In that space is our power to choose our response. In our response lies our growth and our freedom.”

– Viktor Frankl
